Hello,

I would like to request a variance in regards to paving the driveway and parking area for my proposed place of business located at 584 Highway 6, Oxford, MS. The majority of my services will be delivered on site, therefore there will be little need for parking at my actual business location and traffic coming into and out of the location should be limited. Additionally, I only plan to be located in Oxford for a few more years while my wife completes her graduate degree. Considering these two things, it would not be cost effective to pave the driveway and parking area. Furthermore, the entry to the property is a packed gravel drive way. The gravel begins approximately 15 feet off of the highway and is located on a steep incline going towards the property, limiting the chances that gravel from the driveway will make its way to the highway. Thank you for your consideration.

Sincerely,

Troy A. Graham
