Lafayette County Fire Department

Knox Company is the sole source manufacturer, inventor and supplier of Knox® Rapid Entry products. All Knox products are manufactured at our factory in Phoenix, Arizona

The Knox System is preferred by more than 16,000 fire departments and is selected above other lock box programs based on the company's over forty-seven-year reputation for product integrity, quality and reliability. Products include a complete line of lock boxes, cabinets, key switches, padlocks, locking FDC plugs and caps and the MedVault® Narcotics Drug Locker. Knox Company is the only company that meets the UL 1037 Certification required in the state of FL

Knox also manufactures two products that electronically secure the Knox Master Key: KeySecure 5 and KeySecure 6® Key Retention Systems that provide keypad access with full audit trail documentation.

The MedVault® Narcotics Drug Locker provides even more detailed audit information for any vehicles that carry narcotics onboard.

All Knox Rapid Entry System devices carry a UL listing for resistance to physical attack. In addition, products have been UL certified and tested in the following categories:

- UL 437 Standard for Safety for Key Locks
- UL 1037 Standard for Anti Theft Alarms and Devices
- UL 1610 Standard for Central Station Alarms

Knox maintains the highest level of key and lock control. Each exclusively serial coded key is made in our Phoenix plant. These keys are strictly controlled and are only made by Knox.

Included with the Knox System are many services that benefit the fire department. Records of installations in your community are compiled on request, and complimentary materials for distribution to property owners are also provided.

I hope this information helps document how the Knox System satisfies your rapid entry requirements. Please let me know if I can provide further information.

Sincerely,

Wendy Fecteau
