

HOW TO FIND A MAP NUMBER WITHOUT A PARCEL NUMBER

COUNTY LOCATOR

TOWNSHIP LOCATOR

(INDEX TO 1" = 400' & 1" = 200' MAPPING)

6	5	4	3	2	1
03		02		01	
7	8	9	10	11	12
18	17	16	15	14	13
04		05		06	
19	20	21	22	23	24
30	29	28	27	26	25
09		08		07	
31	32	33	34	35	36

In order to locate a tax map without a parcel ID number, You must do the following! Locate the Township Number and the Range Number and follow them to the point that they meet on the Grid provided. That is the first part of your map number. Then go to the Township Locator and find the Section Number you want. The Section Number will be in one of the 9 Township locators, which is your second number. The Section Number is your third number. If it is a Quarter Section it is listed NE=1, NW=2, SW=3, SE=4

Example: If you are looking for Township 4 South and Range 14 West, your first number is 16. Then find your Section Number. Example: Section 16 is in Township Locator number 5, so 5 is your second number and Section 16 is your third number.

This would make your map number 16-05-16. Then go to the map folder that has the first number and you will find the complete map number in that folder.
